

# Florida Department of Health PRIVATE WELL TESTING

**If you are concerned your private well may have been contaminated by flooding from Hurricane Milton, your water can be tested at no cost.**

- After a flood, your water might not be safe. Boil, disinfect, or use bottled water and get your well tested.
- Pick-up a testing kit from the Florida Department of Health in Seminole County at 130 San Carlos Ave. Sanford, FL 32771.
- Results will come from the lab.

**Florida Department of Health in Seminole County  
Environmental Public Health  
130 San Carlos Ave. Sanford, FL 32771.  
407-665-3604**

*This is for private wells only. If you are on public utility, there is no need to test your water as that is being done by the facility.*
